

**PAN INDIA VALIDITY OF SMART CARD WITHOUT TEMPORARY
ATTACHMENT CERTIFICATE (TAC)**

1. Feedback received from the environment shows that ECHS beneficiaries relocating to new station are not getting authorised ECHS services due to misinterpretations of policies by OsIC polyclinics.
2. TAC procedures were adopted in order to facilitate the OsIC to plan their invoices/reorder level of drugs. With the upgradation in software, a new patch in the software enables any polyclinic to change the parent polyclinic of a beneficiary from the reception window for both old and new smart cards. However, following is to be adhered while incorporating any changes in the card :-
 - (a) Change in the parent polyclinic will be allowed only twice in a year and maximum five changes can be done at the polyclinic level. Any further change will be done through Regional Centre.
 - (b) Change of parent polyclinic within NCR is not permitted. However, if any such change is unavoidable, will be incorporated on approval from Regional Centre.
 - (c) Non expendable medical stores can only be issued by the parent polyclinics.
3. For dissemination to all.
